

INDEX

- α -Alanine, nitrification of, 341-349.
- Absorption—
 effect of, on seed germination, 19.
 CO_2 as a factor in, of inorganic elements by plants, 39-44.
 Influence of Water and Salt Solution Upon, and Germination of Seeds (paper), Willem Rudolfs, 15-37.
 Selective, of Ions by Seeds (paper), Willem Rudolfs, 249-252
 the, of phosphate by filters, 149-157.
- Acetone Method—
 The, of Extracting Sulfur from Soil (paper), R. H. Simon and C. J. Schollenberger, 393-396.
- Acidity—
 determination and character of the, of peat soils, 357.
 development of, in culture solution with ammonium salts, 232.
- Adams, J. R., Edgington, G. (paper), Distribution of Nitrogen in the Podsol Profile, 177-179.
- Albrecht, W. A., and Uhland, R. E. (paper), Nitrate Accumulation Under the Straw Mulch, 253-267.
- Alkali Soils, Base Exchange in Relation to (paper), W. P. Kelley and S. M. Brown, 477-495.
- Alkali Studies—
 III. Tolerance of Barley for Alkali in Idaho Soils (paper), Ray E. Neidig and H. P. Magnuson, 367-391.
 IV. Tolerance of Oats for Alkali in Idaho Soils (paper), Ray E. Neidig and H. P. Magnuson, 425-441.
- Alten, F., Blanck, E. and 1924 (Review), Contributions to the characterization and discrimination of "Roterde," 361.
- Alten, F., Blanck, E. and 1924 (review), Experimental contributions to the formation of Mediterranean "Roterde," 362.
- Aluminum—
 the, content of the soil solution and its relation to soil reaction and plant growth, 181-225.
- Ammonia—
 a comparison of nitrogen sources for plants from nitrates and, 227-237.
 Studies on the nitrogen and, contents of the soil, 353.
- Ammonium sulfate, nitrification of, 341-349.
- Arnd, Th. (review), Determination and character of the acidity of peat soils, 357.
- Arrhenius, O. (review), The lime requirements of the soil considered from a plant physiological standpoint, 355
- Azotobacter—
 Inoculating Soil with (paper), P. L. Gainey, 73-87.
- Bacillus—
 A Study of Various Strains of, Radicicola from Nodules of Alfalfa and Sweet Clover (paper), J. W. Stevens, 45-65.
- Bacteriology—
 the nodule bacteria of soybeans: I., of strains, 95-129.
- Bases, replaceable, influence of, on soil colloids, 329-334.
- Batham, H. N. (paper), Nitrification in Soils, 337-351.
- Bimschas, J. 1924 (review), The water transport through the soil and its relation to the hygroscopicity of various kinds of soils, 359.
- Biological activities, effect of, on changes in soil solution, 277.
- Blanck, E., and Alten, F. 1924 (review), Contributions to the characterization and discrimination of "Roterde," 361.
- Blanck, E., and Alten, F. 1924 (review), Experimental Contributions to the formation of Mediterranean "Roterde," 362.
- Blanck, E., and Giesecke, F. 1924 (review), On the influence of earthworms on the physical and biological properties of the soil, 362.
- Blanck, E., and Lohmann, W. (review), On the transformation of quicklime into carbonated lime in the soil, 356.

- Bornemann, 1924 (review), Carbon dioxide nutrition of cultivated plants, 360.
- Bouyoucos, George (paper), Heat of Wetting of Soils Dried at Different Temperatures and the Force at which Soils Absorb Water, 67-72.
- Bremer, O. 1924 (review), Studies on the ease of cultivation of various soils, 358.
- Brown, S. M., Kelley, W. P., and (paper), Base Exchange in Alkali Soils, 477-495.
- Brüne, F., and Tacke, B. (review), The phosphorus requirement of lupines on heather sand soil, 354.
- Burd, John S. (paper), Relation of Biological Processes to Cation Concentrations in Soils, 269-283.
- Burke, Victor, and Burkey, Lloyd (paper), Modifying Rhizobium Radicicum, 143-147.
- Burkey, Lloyd, Burke, Victor and (paper), Modifying Rhizobium Radicicum, 143-147.
- Cabbage, mineral content of, 451-457.
- Calcium—
absorption of, by plants, 9.
content of, in plants grown with and without CO₂ additions, 41-43.
content of cabbage, 451-456.
effect of, on soil colloids, 173.
- Capillary—
laws of the, rise of soil water, 358.
- Carbohydrate metabolism of plants, 459-463.
- Carbon Dioxide—
critical remarks on the action law of the growth factors in factors in fertilizing with, 360.
is, a climatological growth factor?, 359
its influence on the H-ion concentration of soils, 295-298.
nutrition of cultivated plants, 360.
the content of the soil air, 361.
The, Content of the Soil Air as a Factor in the Absorption of Inorganic Elements by Plants (paper), E. W. Parker, 39-44.
the, contents of the air above manured and unmanured soils, 361.
the significance of, in atmosphere and soil on crop production, 359.
where do the German harvests originate? A contribution to soil, 359.
- Carbon-nitrogen ratio in humus extract, 323.
- Carbonic acid—
the H-ion concentration of soils as affected by, and the soil-water ratio, and the nature of soil acidity as revealed by these studies, 285-305.
- Cation concentrations—
relation of biological processes to, in soils, 269-283.
- Clays, The relationship Between Soluble (paper), Gerald R. MacCarthy, 473-475.
- Coeruleo-molybdate method for phosphorus determination, 149-150.
- Colloidal Behavior—
of Soils and Soil Fertility. I. Suction Force of Soils as an Index of their Colloid Content (paper), J. S. Joffe and H. C. McLean, 169-175.
- Colloidal Soils—
Two Unusual (paper), Charles F. Shaw, 419-423.
- Colloids—
determination of soil, 169-174.
method for extraction, 332.
relation between iron and, in clays, 473-475.
- Conductivity of soil solution displacements, 272-275.
- Culture Solutions—
Composition and Appearance of Soybean Plants Grown in, each Lacking a Different Essential Element (paper), Joseph M. Ginsburg, 1-13.
- Cystine, nitrification of, 341-349.
- Densch and Hunnius 1924 (review), The influence of the soil-water content on the yield, on the grain-straw ratio, and on the phosphorus nutrition of oats at various times in the growth period, 355
- Densch, Hunnius, and Pfaff (review), A contribution to the soil acidity problem, 357.
- Diastase—
effect of potassium fertilizer on, production, 459-463.
method of determining, in plants, 462.
- Dolomite—
the disintegration of limestone and, separates as influenced by zone of incorporation, 403-417.
- Duley, F. L. (paper), A Movable Lysimeter for Soil Studies, 465-471.

- Earthworms—
 on the influence of, on the physical and biological properties of the soil, 362.
- Edgington, G., and Adams, J. R. (paper), Distribution of Nitrogen in the Podsol Profile, 177-179.
- Elvehjem, C. A., Peterson, W. H., and Jamison, Lida A. (paper), Variations in the Mineral Content of Cabbage and Sauerkraut, 451-457.
- Englis, D. T., and Lunt, H. A. (paper), Effect of the Concentration of Potassium Salts in Soil Media upon the Carbohydrate Metabolism of Plants. The Diastatic Activity of the Nasturtium, 459-463.
- Eschenhagen, M. 1924 (review), on the potassium nutrition of young rye plants, grown in an unusually small volume of soil, 355.
- Fertilizer—
 the determination of the, requirements of the soil, 361.
- Fertilizers—
 availability of organic nitrogen, 339-349.
 effect of, on soil colloids, 173.
 fertilizing, and cell stimulation, 361.
- Flocculation, correlation existing between, and hydration, 365.
- Freezing point depression, relation of soil moisture content to, 243.
- Fresenius, L., Lemmermann, O., and (review), Investigations on the behavior of lime in the soil, 356.
- Fresenius, L., Lemmermann, O., and (review), On the reaction of German soils, and its significance, 357.
- Gainey, P. L. (paper), Inoculating Soil with *Azotobacter*, 73-87.

studies on the ease of cultivation of various, 358.
the carbon dioxide contents of the air above manured and unmanured, 361.
The Influence of Hydration on the Stability of Colloidal Solutions of (paper), L. C. Wheating, 363-366.
- Soil Solution—**
The Aluminum content of the, and its Relation to Soil Reaction and Plant Growth (paper), O. C. Magistad, 181-225.
- Soil-Water content—**
the influence of the, on the yield, on the grain-straw ratio, and on the phosphorus nutrition of oats at various times in the growth period, 355.
- Straw—**
effect of, on accumulation of nitrates and crop growth, 159-164.
- Straw mulch—**
nitrate accumulation under the, 253-267.
- Sulfur—**
abnormalities due to lack of, in culture solutions, 6.
the acetone method of extracting, from soil, 393-396.
The Rate of Oxidation of Different Forms of Elemental (paper), R. H. Simon and C. J. Schollenberger, 443-449.
- Tacke, B., Brune, F., and (review), The phosphorus requirement of lupines on heather sand soil, 354.
- Thomas, E. C., Stewart, G. R., and Horner, John (paper), The Comparative Growth of Pineapple Plants with Ammonia and Nitrate Nitrogen, 227-241.
- Toxicity, experiments conducted to determine, of Al, 198-209.
- Tryptophan, nitrification of, 341-349.
- Tyrosine, nitrification of, 341-349.
- Uhland, R. D., Albrecht, W. A., and (paper), Nitrate Accumulation Under the Straw Mulch, 253-267.
- Urea—decomposition of, in the soil, 354.
- Water transport—**
the, through the soil and its relation to the hygroscopicity of various kinds of soils, 359.
- Weidemann, A. W., McCool, M. M., and (paper), Some Moisture Relationships of Soils, 243-247.
